

MANUAL DISHWASHING

Ways of washing up

STEPS

Rough soil removal

Soaking

Cleaning

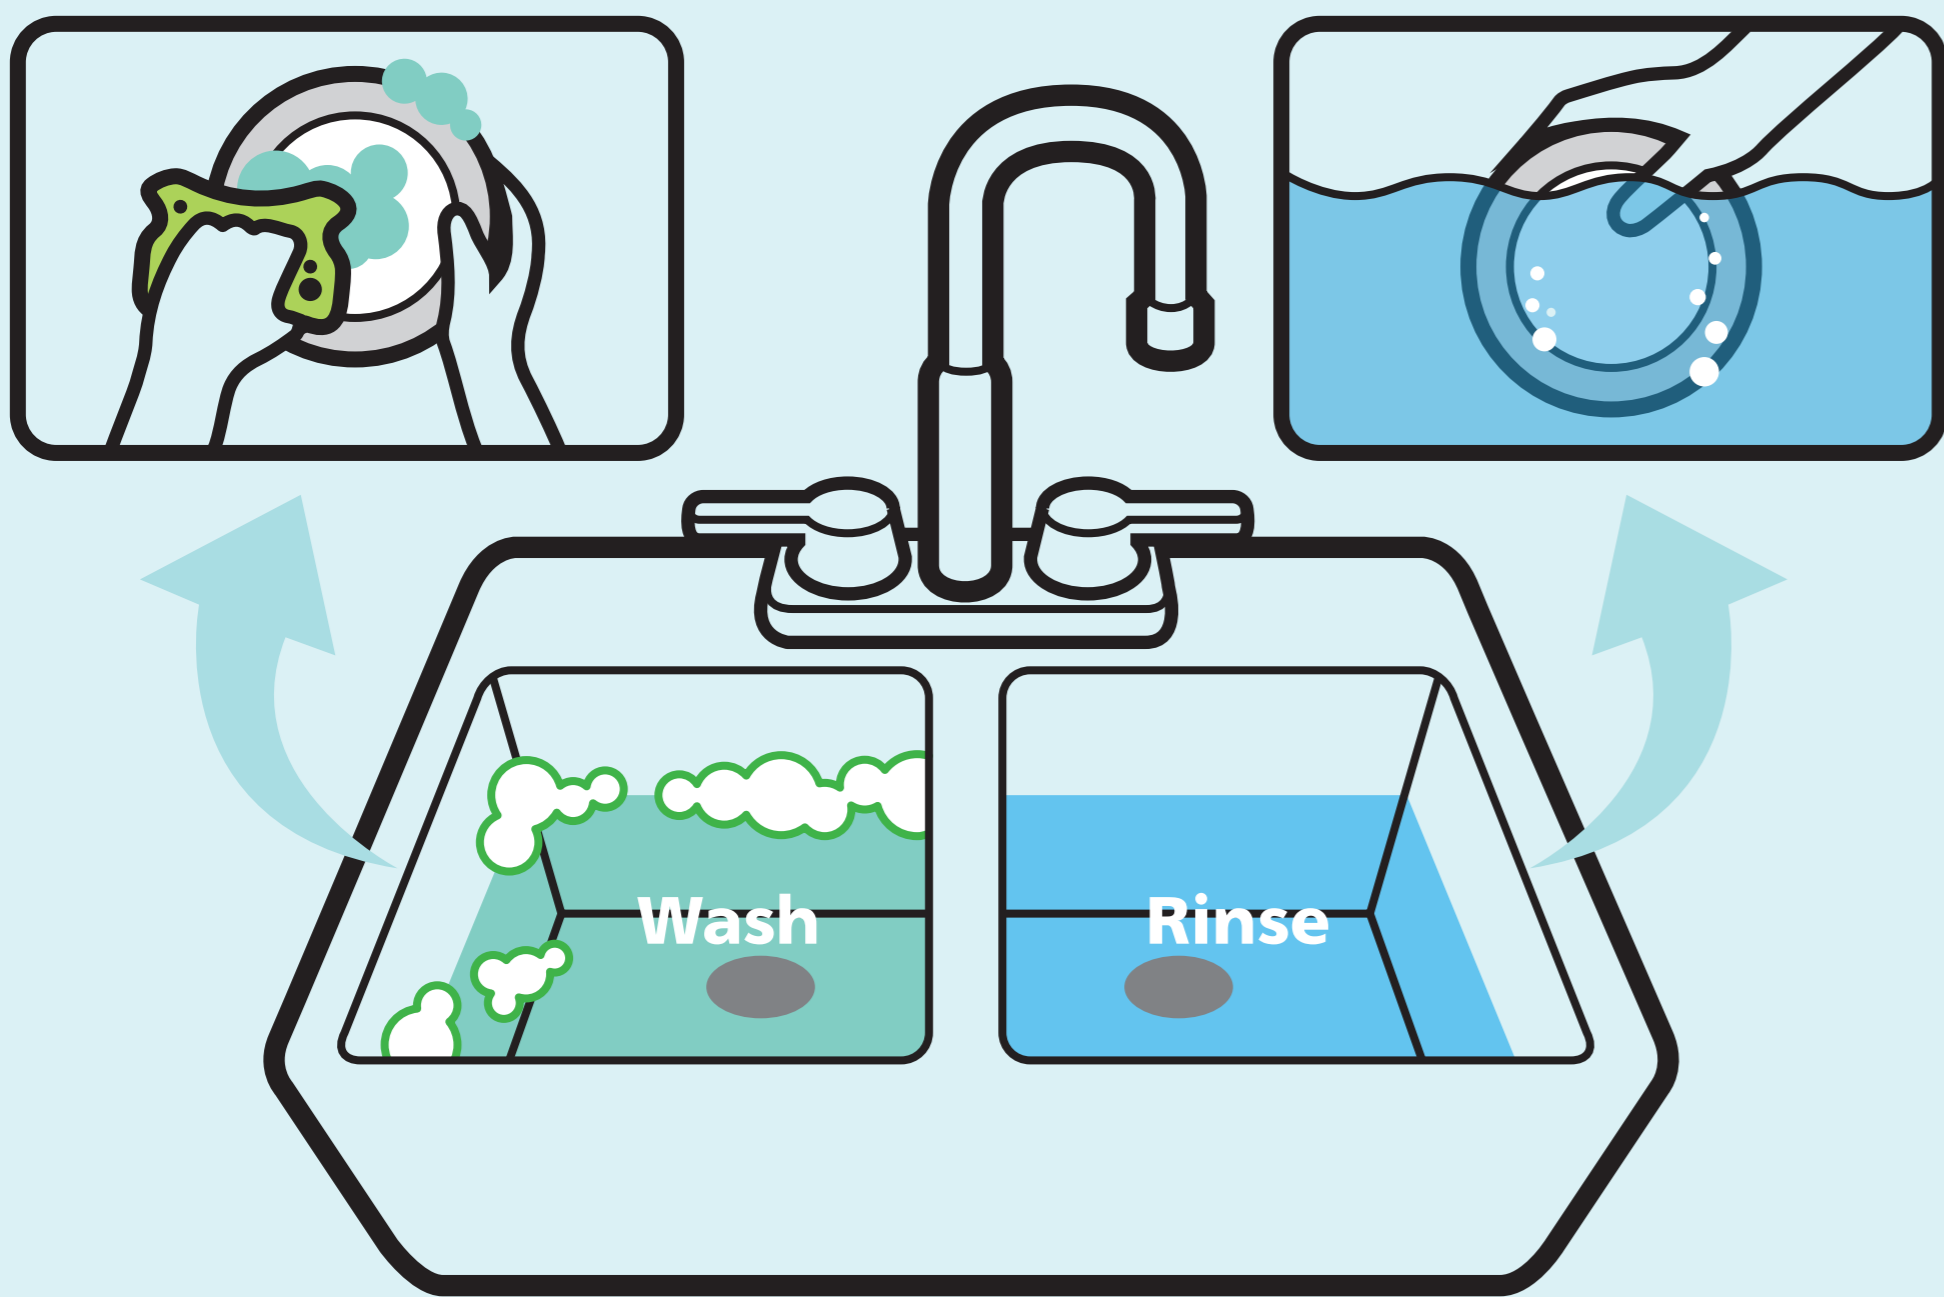

Rinsing

Air-drying

1 IN TWO SINKS

Fill one sink with wash water and the other with rinse water.

Soak heavily soiled dishes with hot water and cleanser.

Rinse with cold water.

Don't wash up under running tap water as this wastes valuable resources.

Add the recommended amount of cleanser after the water to avoid foam production.

2 IN A SINK & A BASIN

If only one sink is available, use a separate bowl for rinsing.

3 NO TAP WATER AVAILABLE

If tap water is not available, wash up in three bowls.

If available use hot water for main cleaning and cold water for prewashing and rinsing

MORE TIPS

Wash lightly soiled items first, heavily ones last.

Collect all dishes before starting.

Use gloves for a sensitive skin.

Change water in sink and bowl when necessary.
