Globalization: asymmetries and the loss of policy space	105
The impact of liberalization and stabilization policies on inequality	108
Financing the social agenda	112
The role of the State and civil society	125
Conclusion	128
VI. The way forward: policies to reduce inequality	131
Redressing global asymmetries	132
Intensifying integrated strategies and policies for poverty eradication	133
Guaranteeing employment opportunities for all	134
Fostering social integration and cohesion	136
Annex. The ten commitments of the World Summit for Social Development	141
Bibliography	143

Figures

I.1	Policy framework: the three main pillars of social development centred on equity and equality	13
I.2	Relationship between life expectancy at birth and the level of public and private health spending, 2002	25
III.1	Evolution of income inequality among countries	45
III.2	Per capita gross domestic product in the poorest and richest countries, 1960-1962 and 2000-2002.	45
III.3	Inequalities in life expectancy between major world regions: deviations of regional life expectancy at birth from that of Australia/New Zealand, (1990-1995 and 2000-2005)	60
III.4	Distribution of all countries according to how far their life expectancy falls below that of Japan, 1990 and 2000	61
V.1	Aid from all Development Assistance Committee (DAC) donors as a percentage of gross domestic product: the long-term trend to 2004	114
V.2	Aid from Development Assistance Committee (DAC) donors as a proportion of gross domestic product	115
V.3	Social sector spending among country groupings classified by income.	120
V.4	Defence and social sector spending in countries with the highest defence expenditures.	122
V.5	Defence and social spending in countries with the highest social sector expenditures.	123

Tables

II.1	Size and growth of the informal economy in selected countries, by sex	31
III.1	Regional per capita income as a share of high-income OECD countries' average per capita income	46
III.2	Distribution of countries according to trends in Gini coefficients for income distribution between the 1950s and the 1990s	48
III.3	Poverty rates for the world, major regions, and China and India	52
III.4	Unemployment rates, labour force growth rate and GDP growth rates for the world and major regions	56
III.5	Levels of under-five mortality for selected countries and between-country inequality indices	63
III.6	Under-five mortality for countries with the highest and lowest rates, 1995, 2000 and 2002.	64
III.7	Immunization coverage among children aged 12-23 months, by country and selected background characteristics	66
III.8	Differentials within and between selected countries in access to skilled medical care at delivery for children born three years before the survey	67
III.9	Adults and children affected by HIV/AIDS: the world and major regions, 2004.	68
III.10	Women living with HIV: the world and major regions, 2004.	69
III.11	Percentages of total, urban and rural household populations with no education, by sex	74
III.12	Inequalities in primary school enrolment: the world and major regions, 1998 and 2001.	75
III.13	Inequalities in secondary school enrolment: the world and major regions, 1998 and 2001.	77
