

HAND LAUNDERING

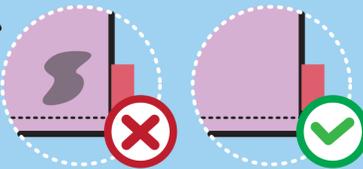

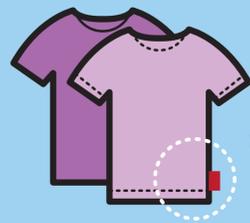

Ways of hand laundering

1 BEFORE LAUNDERING

Sort items by light / dark colours, slight / heavy soiled.

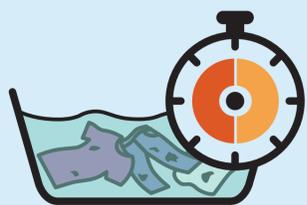

Before laundering an item for the first time, test the detergent on the inside of a hem to be sure that the detergent won't fade the colour.

Prepare basin with warm water to submerge laundry, and add detergent liquid in water.

Use detergent depending on amount of your laundry. **Too much use is wasteful**, damaging to the environment and tough to rinse out!

2 LAUNDERING

Pre-soak the washing for 30 minutes to 1 hour in warm water.

Pre-treat soiled areas by applying detergent or soap directly on the wet item and wash with squeezing rather than rubbing.

Remove from wash water when clean, squeeze out as much water as possible.

Put in the rinse water allowing items to move freely in the bath.

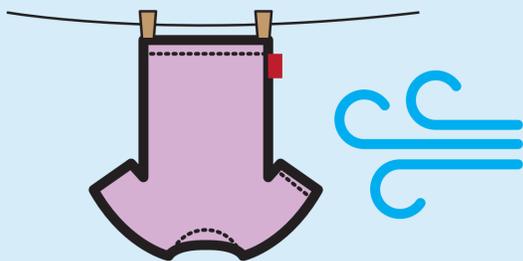

Remove from first rinse, squeeze out as much water as possible.

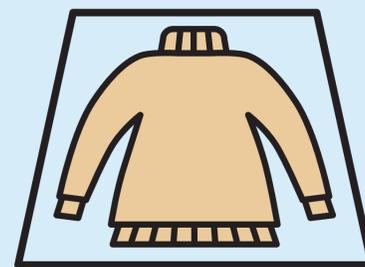

Put in final rinse bath moving the laundry freely in water.

Remove and squeeze out excess water and shake out to remove most wrinkles and more water.

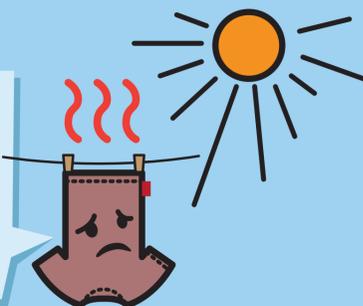

Turn inside out and hang on clean clothesline in a draught and peg on seams and not on edges.

Put garments like sweaters on a flat surface on an absorbing towel and shape in form.

3 AFTER LAUNDERING

Remove from the clothesline once items are dry. Exposure to the sun may cause fading of colours and deterioration of fibres.

Fold / hang and iron if necessary. store in a clean and dry place.
